DETAILED ACTION

EXAMINER'S AMENDMENT

The application has been amended as follows:

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The title has been changed as follows: "Liquid crystal device with an offset toward a clear viewing direction and projection type display device using the liquid crystal device".

Response to Amendment

2. Applicant's arguments, see amendment, filed 02/26/2004, with respect to claims 1-30 have been fully considered and are persuasive. The rejection of 11/26/2003 has been withdrawn.
3. The Examiner thanks the applicant for providing a better explanation of the offset and the clear viewing direction and hence the previous objection has been withdrawn.

Allowable Subject Matter

4. Claims 1-32 are allowed.
5. The following is an examiner's statement of reasons for allowance:

A search of the prior art did not disclose a liquid crystal display device comprising a combination of structural elements, more specifically:

(a) A first and second alignment layers aligning the liquid crystal such that there is a clear viewing direction and light incident from the clear viewing direction is greater than light incident from another direction having a component opposite to the coplanar component of the clear-viewing direction:

(b) A center position of the opening area formed in one of the first substrate and the second substrate is offset toward a clear viewing direction with respect to a center position of an opening area formed in another substrate from which light is transmitted.

(c) The first and the second alignment layers aligning the liquid crystal into an alignment state that produces contrast characteristics showing directivity with

a higher contrast ratio in a clear viewing direction than in a direction opposite of the clear viewing direction.

None of the prior art teaches the establishment of a clear viewing direction through the liquid crystal, and the offset of the substrates toward the clear viewing direction, by alignment of the liquid crystal by the first and second alignment layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prasad R Akkapeddi whose telephone number is 571-272-2285. The examiner can normally be reached on 7:00AM to 5:30PM M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
